LAFROZA PRODUCT CATALOGUE 2024

FROZEN PRODUCTS

FROZEN PRODUCTS

LaFroza's convenience product range includes a variety of herbs, fruits, and berries, offering a simple and quick solution for enriching everyday meals.

Convenient and Efficient Usage

LaFroza products are ready for immediate use. They are pre-cleaned and cut, and packaged in resealable containers, saving time and effort in the kitchen. Use only the required amount and, without worry, return the rest to the freezer, thus avoiding unnecessary food waste. Our products are an ideal solution for quick and healthy meal preparation, providing convenience for both home cooks and professional chefs. The products are excellent for preparing a variety of dishes, from soups and salads to smoothies and desserts.

Fresh and Healthy Taste

Shock-freezing is a process that preserves the authentic and strong taste of the product, as well as its original structure. This method helps prevent the loss of nutritional value and retains all essential vitamins and minerals in the product. Unlike conventional freezing, it does not form large ice crystals, which can break down the product or make it watery when thawed. Smaller crystals melt evenly, maintaining the food's structure and quality.

High-Quality and Eco-Friendly Packaging

LaFroza packaging is convenient, practical, and durable. The resealable containers are easy to use and store, made from robust materials suitable for reuse. The eye-catching and functional cardboard packaging helps maintain the product's freshness and quality, preventing color changes and crystallization, and ensuring a long shelf life.

Advantages for Resellers

Selling LaFroza products offers numerous benefits. Our products are renowned for their quality and reliability, ensuring customer satisfaction and fostering loyalty. Additionally, we provide flexible order options, competitive pricing, and robust marketing materials to support resellers' sales efforts.

QUICK-FROZEN CHOPPED DILL

PRODUCT CODE: 2102066

PRODUCT EAN: 4744741011128

PRODUCT NET WEIGHT: 100 g

PACKAGE MEASUREMENTS: 120x120x45 mm

BEST BEFORE: 24 months

STORAGE CONDITIONS: -18 °C or lower

PACKAGES IN A TRANSPORT BOX: 12 pcs

FREEZE-DRIED PRODUCTS

FREEZE-DRIED PRODUCTS

Advantages of the Freeze-Drying Method

Freeze-drying is a process where products are first rapidly frozen and then placed in a vacuum chamber. In the vacuum chamber, moisture is slowly removed from the product, a process known as sublimation. This process preserves all the essential vitamins, minerals, and natural flavor, color, and texture of the berries and fruits. This method maintains the product's taste and natural composition, without the need to add sugar, colorants, or preservatives.

LaFroza Dry freeze-dried products are ideal for daily consumption and can be enjoyed year-round as if they were freshly picked. Therefore, they are perfect for snacking directly from the jar or for enhancing dishes such as muesli, porridge, or smoothies. They are a healthy alternative for children and pets, replacing candies and other sweets.

Glass Jar – Quality and Eco-Friendliness

LaFroza Dry freeze-dried products are packed in high-quality glass jars. These jars are chemical-free and airtight, preserving the taste and quality of freeze-dried products while ensuring the best possible storage. The jars have an elegant appearance and are perfect for gifting. They are practical and sustainable – they can be recycled or reused multiple times.

FREEZE-DRIED HOME GARDEN MIX

PRODUCT CODE: 600051

PRODUCT EAN: 4744741012415

PRODUCT NET WEIGHT: 65 g

JAR CAPACITY: 720 ml
